

CITATION BRAVO

LIGHT JET PERFORMANCE, FIRST CLASS COMFORT

Comfort and Performance

The Cessna Citation Bravo sets a new standard for private business travel, with more spacious accommodations and a longer travel range than other jets in its class. You'll enjoy your flight aboard this light jet with plenty of room for you to stretch your legs and safely stow away your baggage out of sight.

While they are light jets, the Citation Bravos are more than capable of reaching heights of 45,000 feet, which is far above poor weather. You'll also reach cruising altitudes quickly as it has a climb rate of 3,000 feet per minute.

When you pair its comfortable cabin and extended flight capabilities you can easily see how the Bravo is an innovation in the world of light business jets. It's truly a superb choice for short and long range executive charters. If you want the space to hold a small meeting and the capability of non-stop flight, this is the choice for you.
